

MKU Wins Contract to Supply Ballistic Vests for Estonia's Health Sector

We are proud to announce that MKU Limited has been awarded a contract to supply NIJ Level IIIA ballistic vests to Estonia's State Support Service Center. These vests will be deployed across 11 healthcare institutions, including the North Estonia Regional Hospital Foundation, Tallinn Children's Hospital Foundation, South Estonia Hospital, Narva Hospital Foundation, and several others.

As the recent conflicts in Eastern Europe have increasingly shifted into urban areas, emergency service providers and healthcare workers have become more vulnerable to indirect threats such as shrapnel, stray fire, and blast fragments. This contract reflects Estonia's proactive step in ensuring that its frontline medical teams remain protected while continuing their critical mission of saving lives under high-risk conditions.

"At MKU, we recognize that the role of body armour today extends beyond soldiers and law enforcement. Healthcare workers and first responders are often at the forefront of crises, operating in environments where personal protection is vital. By equipping Estonia's medical professionals with NIJ Level IIIA ballistic vests, we are empowering them with safety and confidence to perform their duties without compromise", quoted Mr. Neeraj Gupta, Managing Director at MKU.

The Kavro ballistic vests to be supplied under this contract combine lightweight comfort with proven ballistic protection against common handgun and fragmentation threats, making them suited for emergency responders who require both mobility and survivability.

Over the years, we have built strong partnerships with armed forces and law enforcement agencies across 230+ forces in more than 100 countries. With this win, we further strengthen our footprint in Europe and reaffirm our position as a trusted and reliable global partner in protection. We take pride in the fact that our solutions, designed and developed in India, are safeguarding not just armed forces and law enforcement agencies, but also critical civilian sectors such as healthcare.

ABOUT US:

MKU Limited is a global defence and homeland security company on a mission to empower heroes. With operations in India, Germany, Brazil and the UAE, we are leading providers of advanced optronics and ballistic protection solutions for soldiers and platforms across the military, paramilitary, homeland security, law enforcement, and special forces.

Over the years, we have delivered protection to over 3 million soldiers and 3,000+ platforms across 230 forces in more than 100 countries. Our solutions are designed to instill confidence in those who stand in the line of duty.

Our Netro range of smart optronics devices provides unmatched aiming, airborne, surveillance, and situational awareness capabilities. These devices are designed for handheld, weapon-mounted, or head-mounted applications, enabling superior performance in the most demanding environments.

Our Kavro range of protection solutions offers enhanced ballistic safety, modularity, and mission compatibility through smart technologies, ergonomic design, and advanced functionality. This includes ballistic helmets, body armours, ballistic shields, and armour solutions for naval, air, and land platforms and vehicles.

Through Navro Platform Maintenance, we offer maintenance, repair, and overhaul (MRO) services that enhance night enablement and upgrade situational awareness, surveillance, and reconnaissance capabilities of key assets such as aircraft, helicopters, naval vessels, Armoured Fighting Vehicles (AFVs), Infantry Combat Vehicles (ICVs), and Air Defence Systems.
