

[FOR IMMEDIATE RELEASE]

MKU Signs a Mega ₹660 Crore Contract with the Indian Army for Night Vision Weapon Sights

[Kanpur, India] — [16 October 2025] We are proud to announce that MKU Limited has signed a landmark contract with the Indian Army for the supply of 29,762 units of its state-of-the-art Netro NW 3000 Night Vision Weapon Sights, valued at approximately ₹660 Crore. The contract, concluded under the Raksha Mantri's powers, is among the largest electro-optics orders ever placed by the Indian Army, reaffirming the nation's commitment to building indigenous capability under the Make in India and Atmanirbhar Bharat initiatives.

This also marks one of the largest contracts ever for electro-optics in India. It reiterates MKU's Netro Optronics division's unwavering commitment to innovation and technological excellence in pursuit of India and Hon'ble Prime Minister Narendra Modi's vision of Atmanirbhar Bharat, a self-reliant and globally competitive India in defence manufacturing. Through sustained investment in R&D and a sharp focus on

indigenously designed electro-optic systems, MKU continues to empower India's armed forces with world-class night vision and thermal imaging solutions that enhance situational awareness, target acquisition, and operational dominance. The Netro NW 3000 underwent rigorous evaluation and extensive field trials, standing as a testament to MKU's technological depth, reliability, and uncompromising quality standards.

The agreement was signed in the presence of the Defence Secretary, Shri Rajesh Kumar Singh, IAS, and Dr. Ajay Kumar, IAS. The Netro NW 3000, designed and developed indigenously by MKU under the IDDM (Indigenously Designed, Developed and Manufactured) category, is compatible with Assault Rifles and provides enhanced night-fighting capability, empowering heroes to operate with superior clarity, precision, and confidence during nighttime operations.

Earlier in July 2025, MKU had also secured another major electro-optics contract under the Vice Chief of Army Staff's powers for the supply of 5,642 Thermal Imaging Weapon Sights for Light Machine Guns. With both these back-to-back successes, MKU

continues to play a pivotal role in enhancing the Indian hero's operational edge across diverse combat environments.

“This contract reflects the Indian Army's continued trust in MKU's R&D capability and indigenous manufacturing excellence. Over the years, MKU has emerged as a strong electro-optics company, built on a unique combination of deep defence domain understanding and a culture of innovation that allows us to precisely address the evolving operational needs of modern soldiers. This is not just a business milestone, but a proud contribution to India's defence self-reliance story, driven by innovation, integrity, and the spirit of the Indian soldier,” said Mr. Neeraj Gupta, Managing Director at MKU.

With world-class facilities, deep R&D capability, and a legacy of delivering protection and performance across 230+ forces globally, MKU remains steadfast in its mission to empower India's Armed Forces with advanced, indigenously developed solutions that redefine capability, confidence, and combat readiness.

ABOUT US:

MKU Limited is a global defence and homeland security company on a mission to empower heroes. With operations in India, Germany, Brazil and the UAE, we are leading providers of advanced optronics and ballistic protection solutions for soldiers and platforms across the military, paramilitary, homeland security, law enforcement, and special forces.

Over the years, we have delivered protection to over 3 million soldiers and 3,000+ platforms across 230 forces in more than 100 countries. Our solutions are designed to instil confidence in those who stand in the line of duty.

Our Netro range of smart optronics devices provides unmatched aiming, airborne, surveillance, and situational awareness capabilities. These devices are designed for handheld, weapon-mounted, or head-mounted applications, enabling superior performance in the most demanding environments.

Our Kavro range of protection solutions offers enhanced ballistic safety, modularity, and mission compatibility through smart technologies, ergonomic design, and advanced functionality. This includes ballistic helmets, body armours, ballistic shields, and armour solutions for naval, air, and land platforms and vehicles.

Through Navro Platform Maintenance, we offer maintenance, repair, and overhaul (MRO) services that enhance night enablement and upgrade situational awareness, surveillance, and reconnaissance capabilities of key assets such as aircraft, helicopters, naval vessels, Armoured Fighting Vehicles (AFVs), Infantry Combat Vehicles (ICVs), and Air Defence Systems.
